b. In recent use, after Carlyle, often applied more or less disparagingly, e.g. to rules unintelligently or slavishly followed, to fettering conventionalities of usage, to beliefs held or professed out of mere acquiescence in tradition, etc.

Carlyle's use of the word was clearly suggested by the words used of Mirabeau by his father, 'Il a humé toutes les formules'. This really meant that M. had unreflectingly 'swallowed' the watchwords, or cant phrases of his revolutionary friends; but Carlyle mistranslated *humé* by 'swallowed up, made away with', and frequently alludes to the passage as thus misinterpreted. Carlyle's use of *formula*, however, though suggested by a mistake, is in itself a very natural development from the ordinary sense.

D. *Forth-* in composition. In OE. and ME. the combinations of *forth* adv. with vbs. are hardly to be considered compound words; whether the adv. precedes or follows the vb. depends on euphonic or other conditions which do not affect the sense. The agent-nouns, nouns of action, and ppl. adjs. corresponding to these verbal locutions were formed by prefixing *forth* to the verbal noun or adj. corresponding to the verb. In mod. Eng. compound vbs. formed with *forth-* are rare; but *forth-* is often used as a prefix in the formation of nouns of agent and action, and ppl. adjs. corresponding to the verbal phrases (compound verbs in sense but not in form) in which the adv. follows the verb. More frequently, however, the agent-noun, etc. is followed by the adv.; thus we have a *setter forth*, but **forthsetter* is app. not recorded. For the formation of ppl. adjs. the prefix is the only means available; and in poetry from Pope onwards it is very common in pres. pples.

In some OE. and ME. words, *forth-* appears as a substitute for *FOR-*: see *FORTHFATHER*, *FORTHWARD*, *FORTHWITH* 2.

The more important compounds of *forth-* will be treated in their alphabetical place as Main words; those enumerated in this article are nonce-words or of rare occurrence.

Forwards (fō'wɔrdz), *adv.* (and *a.*) [f. FORWARD with *advb.* genitive -s: see -WARDS.]

A. adv. = FORWARD *adv.* in its various senses.

The present distinction in usage between *forward* and *forwards* is that the latter expresses a definite direction viewed in contrast with other directions. In some contexts either form may be used without perceptible difference of meaning; the following are examples in which only one of them can now be used: 'The ratchet-wheel can move only *forwards*'; 'the right side of the paper has the maker's name reading *forwards*'; 'if you move at all it must be *forwards*'; 'my companion has gone *forward*'; 'to bring a matter *forward*'; 'from this time *forward*'. The usage of earlier periods, and of modern dialects, varies greatly from that of mod. standard English. In U.S. *forward* is now generally used, to the exclusion of *forwards*, which was stigmatized by Webster (1832) as 'a corruption'.

Common or vulgar fractions are those in which the numerator and denominator are represented by numbers placed the one above, the other below, a horizontal line. Sometimes *fraction* is used for 'vulgar fraction', or for a quantity expressed by means of a numerator and denominator; e.g. 'the fraction $\frac{3}{2}$ ' = 1½. For *complex, compound, continued, decimal, proper and improper fractions*, see those words.

b. *Free school*: 'a school in which learning is given without pay' (J.).

It has been denied that this was the meaning of 'free (grammar) school', *L. libera schola grammaticalis*, as the official designation of many schools founded under Edw. VI. The denial rests on the two assertions (both disputable): that the Eng. phrase is a translation of the Latin, not the reverse; and that *liber* could not mean 'gratuitous' in mediæval any more than in classical Latin. Many different interpretations of the adj. have been proposed: (1) exempt from ecclesiastical control; (2) exempted by licence from the operation of the statute of mortmain, and hence entitled to hold property (to a limited amount); (3) giving a liberal education; (4) 'privileged' or 'authorized'. We have failed, however, to find any example in which the interpretation 'gratuitous' is inadmissible (though the schools called 'free' were often gratuitous only to a select number or class of scholars); and there is abundant proof that this interpretation was already current before the time of Edw. VI.

Freemason (frī-me'sən, -s'n). [f. FREE *a.* + MASON.]

The precise import with which the adj. was originally used in this designation has been much disputed. Three views

have been propounded. (1) The suggestion that *free mason* stands for *free-stone mason* would appear unworthy of attention, but for the curious fact that the earliest known instances of any similar appellation are *mestre mason de franche peer*, 'master mason of free stone' (Act 25 Edw. III. st. ii. c. 3, A.D. 1350), and *sculptores lapidum librorum*, 'carvers of free stones', alleged to occur in a document of 1217 (tr. *Findel's Hist. Mas.* 51, citing Wyatt Papworth); the coincidence, however, seems to be merely accidental. (2) The view most generally held is that *free masons* were those who were 'free' of the masons' guild (see *FREE a.* 29). Against this explanation many forcible objections have been brought by Mr. G. W. Speth, who suggests (3) that the itinerant masons were called 'free' because they claimed exemption from the control of the local guilds of the towns in which they temporarily settled. (4) Perhaps the best hypothesis is that the term refers to the mediæval practice of emancipating skilled artisans, in order that they might be able to travel and render their services wherever any great building was in process of construction.]

†1. A member of a certain class of skilled workers in stone, in the 14th and following centuries often mentioned in contradistinction to 'rough masons', 'ligiers', etc. They travelled from place to place, finding employment wherever important buildings were being erected, and had a system of secret signs and passwords by which a craftsman who had been admitted on giving evidence of competent skill could be recognized. In later use (16-18th c.) the term seems often to be used merely as a more complimentary synonym of 'mason', implying that the workman so designated belonged to a superior grade. *Obs.*

1376 in Conder *Hole Craft* 51 [A list of the city companies with the number of their representatives on the Council has: Free masons 2, Masons 4. 2. A member of the fraternity called more fully, *Free and Accepted Masons*.

Early in the 17th c., the societies of freemasons (in sense 1) began to admit honorary members, not connected with the building trades, but supposed to be eminent for architectural or antiquarian learning. These were called *accepted masons*, though the term *free masons* was often loosely applied to them; and they were admitted to a knowledge of the secret signs, and instructed in the legendary history of the craft, which had already begun to be developed. The distinction of being an 'accepted mason' became a fashionable object of ambition, and before the end of the 17th c. the object of the societies of freemasons seems to have been chiefly social and convivial. In 1717, under the guidance of the physicist J. T. Desaguliers, four of these societies or 'lodges' in London united to form a 'grand lodge', with a new constitution and ritual, and a system of secret signs; the object of the society as reconstituted being mutual help and the promotion of brotherly feeling among its members. The London 'grand lodge' became the parent of other 'lodges' in Great Britain and abroad, and there are now powerful bodies of 'freemasons', more or less recognizing each other, in most countries of the world.

[A Com. Teut. str. vb.: OE. frēosan = MLG. vrēsen, Du. vriezen, OHG. friosan (MHG. vriesen, mod. Ger. frieren), ON. frīsa (Sw. frysa, Da. fryse), Goth. *friusan (inferred from frūs frost): — OTeut. *freusan, f. root *freus-, fraus-, fruz-: — pre-Teut. *preus-, prous-, prus-; cf. Lat. pruīna (— ? *pruvinā hoar-frost), Skr. prūṣva drop, frozen drop, hoar-frost; less obviously connected in sense are L. prūrīre to itch, pruīna (— *pruṣnā) live coal, Skr. pluṣ to burn; some scholars assume contamination with the Aryan root *greus, grus to freeze, whence Gr. κρύσταλλος ice.

The OTeut. conjugation was *freus-, fraus-, fruzum, frozono-, which is accurately represented in the OE. frēosan, frēas, friuron, froren. The later Eng. form of the pa. pple. frozen, frozen (whence pa. t. froze) is due to the analogy of the pres-stem; similarly ON. has frosern (possibly the source of the Eng. form) beside the older frērenn, and Du. has pa. t. vroor, pa. pple. vrozen, as well as the correct vroos, vroren; the MHG. inf. vriesen, pa. t. vrōs, have become in mod. Ger. frieren, fror, through the analogy of the pa. pple. gefroren.]

Frill (fril), sb.¹ [This and the related FRILL v.¹ are of uncertain origin. The common view is that FRILL v.³, to shiver, gave rise to a sb. (see FRILL sb.³) meaning 'the ruffling of a hawk's feathers when shivering', and that the word as applied to an article of costume is a transferred use of this. But this hypothesis finds no support in the rare early instances of the words; and there is no proof that the sb. ever had the alleged sense. Sense 2 of the vb. suggests that it may be a metathetic form of FURL; but this is app. peculiar to Knolles, and should perh. be regarded as an unconnected word. The sb. as used by butchers (sense 3 below) is commonly regarded as a transferred sense from the 'frill' of a shirt; but the analogy of CHITTERLING and of F. *fraise* (mesentery of a calf, 14th c.; ruff, frill, 16th c.) suggests the possibility that the butchers' sense may be the original (though not recorded until quite recently). Godef. has one quot. for an OF. ppl. *frolé* (v. r. *froleit*) = 'frilled' (said of a shirt); and it is noteworthy that in the 17th c. the F. equivalent of FURL v. (cf. FRILL v.¹ 2) was *fresler*, which seems to belong to OF. *freseler* to frill, adorn, f. *fresel*, -ele, dim. of *fraise* ruff; but it is not easy to see how Eng. *frill* can be connected with these words.]

1. An ornamental edging made of a strip of any woven material, of which one edge is gathered and the other left loose so as to give it a wavy or fluted appearance. *Toby-frill*, such as appears on the figure of Toby in the frontispiece of *Punch*.

Frith (friþ), *sb.*² Forms: 1 (3e) *fyrhðe*, *fyr(h)ð*, 4 *friht*, *fryht*, 5 *freth*, 9 *Kent. fright* (-wood), 6 *fryth* (e, 3-*frith*). Also *FIRTH* *sb.*¹ [OE. (3e) *fyrhðe* str. neut. (also *fyrhð* str. fem.): -O Teut. type *(ga) *furhipjom* (see below). In ME. and in mod. E. the word seems to have been confused with others of similar sound: see the remarks under senses 1 and 4 below.

The OTeut. type *(ga) *furhipjom* would appear to be a collective f. **furhā* FIR; but there is no trace in Eng. of the etymological sense 'fir-wood', and as firs seem to have been not very abundant in early times in this country, the development of the general sense 'wooded or waste land' must have taken place on the continent. Cf., however, the mod. Ger. *forchdistel*, *forchgras*, *forchheide* (Grimm), which seem to contain a word that may be the source of med. L. *frocus* (OF. *from*) waste land; if so *fyrhðe* may be derived from it.

With regard to the form-history in Eng., the reduced form *fyrðe* is represented by *FIRTH* *sb.*¹, and with metathesis by *frith*. The fuller form *fyrhðe* is represented, with metathesis, by ME. *fritht*, mod. Kentish *fright-wood*.

The Welsh *ffridh*, *ffrith*, often given as the etymon, are adopted forms of the Eng. word.

To the scanty evidence for the OE. *fyrhðe* must be added the place-name *Pirbright* in Surrey, which in documents of 13th and 14th c. appears as *Pirifirith*, *Pirifright*, *Pirifright*: -OE. **frig-fyrhðe* pear-*frith*: see *Cal. 4. A hedge; esp. one made of wattled brushwood; also, a hurdle.

[Although this sense appears to be chiefly a development of sense 3, it may partly belong to other words of similar form but etymologically unconnected. (1) The sense 'hedge', and the related *frith* v.² 1, might without difficulty be regarded as special uses of *FRITH* sb.¹ and v.¹; cf. MHG. *vride* (= *FRITH* sb.) used in the senses of 'fence, fenced place', mod. Ger. *einfridigen* to fence in. (2) As in S.W. dialects both *fr* and *wr* are represented by *vr*, it is possible that *frith* in the sense of 'wattled work' may be partly a literary rendering of a dialectal *vrith*, *vræath* connected with OE. *wrðan* (see WRITHE, WREATH).

(see FROSH) = Du. *vorsch*, OHG. *forsk* (MHG. *vorsch*, mod. G. *frosch*), ON. *frosk-r*: -O Teut. **frosko-s*; (2) ME. *frūde*, FROUD, frog or toad, related by ablaut to ON. *fraud-r*, OSw. pl. *frōdhir* (Da. *frø*); cf. OF. *froil*, *frot* toad, which is perh. of Scandinavian origin; (3) ON. *franke*, whence perh. the ME. *froke*, given among the forms of the present word.

The etymological relation between the various Teut. words involves some unsolved difficulties. Some scholars, on the ground of OE. *frogga*, and ON. *franke*, assume a root ending in a guttural, and explain O Teut. **frosko-as* = **froh-sko*. This does not account for the ME. *frūde*, ON. *fraud-r*, and hence it has been suggested that the common root of all the words is *frud-* (*frad-*), *frand-*, *frūd-*; O Teut. *frud-* + suffix -*ko* would by phonetic law become **frosko-*; the ON. *franke* appears to be for **frandke*. With regard to OE. *frogga* it may be remarked that the ending -*gga* occurs in several other names of animals: cf. *slagga*, *dogga*, *wicga*. It is possible that *frogga* may owe its form to the analogy of other animal names with this termination.

1. A tailless amphibious animal of the genus *Rana*, or, in wider sense, of the family *Ranidae*.

The *Prompt. Parv.* (Norfolk, c1440) explains *frogge*, *frugge* as meaning 'toad' (*bufo*), while the forms *froke* and *frosche* are said to mean 'frog' (*rana*). It is not known whether this distinction was recognised in the Norfolk dialect of the time; modern East Anglian glossaries do not mention it.

† **Frundel**, *Obs.* Forms: 6 *frondaille*, *frundel*, 6-7 *frundel* (1, 7 *frundele*). [app. a var. of *farundell*, *FARTHINGDEAL*.] A dry measure; by Ray said to be equal to two pecks.

Quot. 1641 seems to identify the *frundel* and the peck. This appears more probable than Ray's statement, if the word means etymologically 'quarter' (of a bushel); but the discrepancy may admit of being explained, as Ray mentions the existence of a 'bushel' twice as large as the standard bushel.

Fude, obs. form of FEUD¹, FOOD.

Fudge (fʊdʒ), *int. and sb.* [Origin obscure.]

The int. as used by Goldsmith (quot. 1766) seems from the context merely to represent an inarticulate expression of indignant disgust, though later writers who adopted it from him use it with a more definite meaning. The sb. appears to have been developed partly from the int., and partly from FUDGE *v.* The etymology suggested in the annexed quot. 1700 can hardly be correct, though Captain Fudge, 'by some called Lying Fudge', (*Letter* of 1664 in *Crouch Posthuma Christiana* 1712, p. 87) was a real person (the surname is still common in Dorset). The nautical phrase 'You fudge it', associated in 1700 with the name of the mendacious captain, prob. belongs to FUDGE *v.* 1. In a dialogue of 1702, 'The Present Condition of the English Navy', one of the interlocutors is called 'Young Fudge of the Admiralty', perh. with allusion to the same verb.

1700 *Remarks on the Navy in D'Israeli Cur. Lit., Neology* (1841), There was, sir, in our time one Captain Fudge... who... always brought home his owners a good cargo of lies, so much that now aboard ship the sailors, when they hear a great lie told, cry out, 'You fudge it!'

W.* xi, The very impolite behaviour of Mr. Burchell, who... at the conclusion of every sentence would cry out Fudge! c 1818 PEEL in *Croker Papers* (1884) i. iv. 116 To all the latter part of your letter I answer... —**fuge** (hū'dʒ), *suffix*, occurring in words (adj. and sb.) f. mod. *L.* types in *-fugus*. According to classical *L.* analogy, this ending should be connected with *fugere* to flee (cf. *profugus*), and should have the

sense 'fleeing from' (cf. *lucifugus*, *erifuga*). In the medical words *febrifugus*, lit. driving away fevers, *vermifugus* expelling worms, however, the ending derives its sense from *L. fugare*, to put to flight. In imitation of the anglicized forms of these, nonce-wds. in *-fuge* have occasionally been formed; chiefly on *Lat.* stems, as *DEMONIFUGE* (q.v.), *dolorifuge*, something to drive away pain; but occasionally on *Eng.* words, as *mendacity-fuge*.

Ful, obs. form of **FOUL**.

-ful, suffix, originally identical with **FULL** *a.*

1. Forming adjs. In OE. the adj. *full*, like its equivalent in the other Teut. langs., was used in

composition with a preceding sb., forming adjs., the etymological sense of which (= 'full of...') is usually somewhat weakened, so that the words may be rendered 'having', 'characterized by' (the attribute denoted by the sb.); the meaning of the suffix thus differs little from that of *L. -osus*, *-ous*. In ME. and in mod.E. many new formations of this type have arisen, some of them from Romanic sbs., as *beautiful*, *graceful*; and the suffix is still to some extent productive. In the 14th c. a few new forms arose in which the suffix had the force of 'possessing the qualities of'; e.g. *masterful*, *manful*. In OE. *-full* was not ordinarily appended to adjs.; an instance occurs in *deorfull*, *DARKFUL*, used to render *L. tenebrosus*, and prob. formed in imitation of it. In the 16th and 17th c. a few new words appear *f.* adjs. or *L.* adj. stems + *-ful*, e.g. *direful*, *grateful*, *tristful*, *fiereful*; prob. these were due to the analogy of older synonyms having this suffix, though it is possible that they may have been in part suggested by It. words like *gratevole* (*gradevole*), the ending of which has an accidental resemblance to the Eng. suffix. As the sbs. to which *-ful* is appended are often nouns of action or state coincident in form with the stems of related vbs., it happens frequently that a word really *f.* a sb. + *-ful* is associated in ordinary apprehension rather with the vb. than the sb. (For this there are sometimes special causes; e.g. the sb. *thank* being obsolete in the sing. while *thank* vb. is current, the adj. *thankful* is naturally viewed as a derivative of the latter.) Hence in mod.Eng. adjs. in *-ful* are sometimes formed directly on verb-stems, the sense of the suffix being 'apt to', 'able or accustomed to', as in *assistful*, *distractful*, *crossful*, *mournful*; an example of a passive sense (= *-able*) occurs in *bashful*.

2. Forming sbs. In the Teut. langs. the form of expression in which a sb. denoting a receptacle is followed by the adj. **FULL** in concord with it and governing a genitive (e.g. 'a hand full of corn') was used, not only in its proper sense, but in the transferred sense of 'the quantity that fills or would fill' (the receptacle): see **FULL** *a.* 1 b. The ambiguity thus arising is partly obviated by a differentiation of form; the sb. and adj. are treated as independent words when they retain their proper sense, but as forming a compound when the sense is transferred. This differentiation has not been carried out to an equal extent in the various langs. In *Ger.*, *handvoll* 'handful', *mundvoll* 'mouthful' are written as single words, but this makes no real difference in their syntactical value; the gender of the quasi-compound is determined by that of its first element, and there is no inflexion. In OE. the development had proceeded a step further in the case of *handfull*, which, although retaining the fem. gender of *hand*, was so completely one word as to be declinable (accus. *-fulle*, pl. *-fulla*, after the prevailing declension of feminines); in the 14th c. the pl. was *handfullis*. No other compound of this class is found in OE.; commonly the notion was expressed in the original Teut. manner by the adj. *full* in concord with the sb. This continued also in ME.; but owing to the practice of using the sing. of a noun of quantity instead of the pl. after a numeral, there is seldom any evidence to show whether the ME. antecedent of a word like *dishful* is to be regarded as a syntactical combination or as a single word. In mod.Eng. *-ful* has become a suffix forming derivatives with the general sense 'quantity that fills or would fill' (something), and may be attached at pleasure to any sb. denoting an object that can be regarded as holding or containing a more or less definite quantity of anything; thus we have not only *bottleful*, *boxful*, *canful*, *spoonful*, etc., but *bookful*, *churchful*, *houseful*, *worldful*, etc. The plural forms *spoonsful*, *cnpsful*, etc., which are still sometimes heard, represent either a survival of, or (much more probably) a return to, the older grammatical view; but though they have thus some appearance of historical justification, they are contrary to good modern usage, and are objectionable on account of their ambiguity.

The ON. *-fyllr* (*handfyllr* handful, *munnfyllr* mouthful, etc.) is not identical with the Eng. suffix, but is the sb. *fyllr* fem. = *FILL* *sb.*, and the compounds are therefore all fem., whatever the gender of the first element.

6. *Math.* A variable quantity regarded in its relation to one or more other variables in terms of which it may be expressed, or on the value of which its own value depends.

[This use of the *L. function* is due to Leibnitz and his associates. A paper in the *Acta Eruditorum* for 1692, pp. 169-170, signed 'O. V. E.', but prob. written by Leibnitz, uses *functiones* in a sense hardly different from its ordinary untechnical sense, to denote the various 'offices' which a straight line may fulfil in relation to a curve, viz. its tangent, normal, etc. In the same journal for 1694, p. 316, Leibnitz defines *functio* as 'a part of a straight line which is cut off by straight lines drawn solely by means of a fixed point, and of a point in the curve which is given together with its degree of curvature'; the examples given being the ordinate, abscissa, tangent, normal, etc. As the *functiones* (in Leibnitz's sense) of a curve are variable quantities having a fixed mutual relation, this use of the word easily developed into the modern sense, which occurs in the writings of the Bernoullis early in the 18th c. A somewhat peculiar use occurs about 1713, in Leibnitz's *Hist. et Origo Calc. Diff.* (*Math. Schriften* ed. Gerhardt V. 408), where he says that just as constant quantities have their 'functions', viz. powers and roots, so variables have also 'functions' of a third kind, viz. differentials.]

Rees) s. v., The term *function* is used in algebra, for an analytical expression any way compounded of a variable quantity, and of numbers, or constant quantities. 1789 WARRING in *Phil. Calculus* I. § 6 (ed. 2) 2 When one quantity depends upon another or upon a system of others, so that it assumes a definite value when a system of definite values is given to the others, it is called a function of those others. 1893 FORSYTH *Theory of Functions* 8 A complex quantity w is a function of another complex quantity z when they change together in such a manner that the value of $\frac{dw}{dz}$ is independent of the differential element dz . This is Riemann's definition.

Furlong (fū'rlɒŋ). Forms: 1 furlang, -ung, 2 -eng, 3-5 fur(e)lang(e, 4 ferlong, fourlonge, 4-5 for(e)lang(e, 4-6 -long(e, 4-5 fur(e)longe, 4- furlong. Pl. 4-5 for-, furlong. [OE. *fur-lang* str. neut., f. *furh*, FURROW + *lang*, LONG a.]

1. Originally, the length of the furrow in the common field, which was theoretically regarded as a square containing ten acres. As a lineal measure, the furlong therefore varied according to the extent assigned at various times and places to the ACRE, but was usually understood to be equal to 40 poles (rods, perches). As early as the 9th c. it was regarded as the equivalent of the Roman *stadium*, which was $\frac{1}{8}$ of a Roman mile; and hence *furlong* has always been used as a name for the eighth part of an English mile, whether this coincided with the agricultural measure so called or not. The present statute furlong is 220 yards, and is equal both to the eighth part of a statute mile, and to the side of a square of 10 statute acres.

Fy, *obs.* form of FIE.

Fy-: see also FI-.

-fy (*fai*), *suffix*, forming *verbs*. The older Eng. vbs. in *-fy* are adoptions of Fr. vbs. in *-ficāre*, which are either adapted from Lat. vbs. in *-ficāre* or formed on the analogy of vbs. so originating. (The form *-fier* was used as the representative of L. *-ficāre* on the analogy of words like *santificāre*:—*santificāre*.) The Lat. vbs. in *-ficāre* were originally derivatives of adjs. in *-fic-us* (see -FIC), though subsequently the suffix could be used to form vbs. without the intervention of an adj. They may be divided into three classes (corresponding to three classes of adjectives in *-ficus*: see -FIC), all of which are represented by adapted words in Eng.: (1) vbs. f. sbs., with the sense 'to make, produce', as *pacificāre* (orig. *intr.* to make peace) *pacify*, *edificāre* *edify*, or 'to make or convert into something', as *deificāre* *deify*; (2) f. adjs., with the sense 'to bring into a certain state', as *santificāre* *sanctify*; (3) f. vb.-stems, with causative sense, as *horrificāre* *horrify*. In med.L. there was a tendency to substitute *-ficāre* for *-facere* in the few Lat. vbs. so ending, and hence Fr. and Eng. vbs. in *-fier*, *-fy* sometimes correspond to Lat. vbs. in *-facere*; e.g. F. *stupéfier* (but in pa. pple. *stupéfait* as well as *stupéfié*) *stupefy*, OF. *satisfier* (but mod.F. *satisfaire*) *satisfy*, F. *liquéfier* *liquefy*, F. *rubéfier* *rubefy*, med.L. *caleficāre* *calefy*. Exc. in the case of these few vbs. the ending has normally the form *-ify* (for the reason see -FIC). It is now used as the regular rendering of *-ficāre* in new words adopted from Lat. or formed on assumable Lat. types, and is also freely added to Eng. adjs. and sbs. to form vbs., mostly somewhat jocular or trivial, with the senses: 'to make a specified thing', as *speechify*; 'to assimilate to the character of something' (chiefly in pa. pple., as *countrified*); 'to invest with certain attributes', as *Frenchify*. (A large proportion of these vbs. are from sbs. and adjs. ending in *-y* or *-ey*, the suffix then having the form *-fy* instead of the usual *-ify*. An early example is *beautify*, but the analogy on which this word was formed is not clear.) In a few cases the suffix has been quite irregularly added to vb. stems, but the words are either obsolete, as *dedify*, *hindrify*, *ornify*, or merely jocular or illiterate, as *argufy*. The noun of action related to vbs. in *-ify* normally ends in *-ification*, though, by confusion of suffix, *pétrification* is used in Eng. where Fr. has more correctly *pétrification*. The words in which *-fy* represents L. *-facere* have their corresponding nouns of action ending in *-faction*.

The following examples illustrate the freedom with which this suffix has been used in the formation of nonce-words.

1602 DEKKER *Satirromastix* Liva, Nay by Sesu you shall bee a Poet, though not Lawrefeyd, yet Nettleyfed so. 1647 TRAPP *Comm. Ephes.* iv. 15 But speaking the truth... Doing the truth... SEWARD *Let.* (1811) II. 381 Though fashion has now huffed us all. 1834 SOUTHEY *Doctor* II. Inter-ch. vi. 119 Either of these misfortunes would have emasculated his mind, unipessifying and unegoifying the *Ipissimus Ego*. 1844 HALIBURTON *Sam Slick* in *Eng.* I. viii. 135 He might have known bow to feel for other folks, and not funkify them so peskily. 1872 [EARL PEMBROKE & G. H. KINGSLEY] *S. Sea Bubbles* viii. 206 The boom of the pigeon is wondrous pleasant and drowsyfyng.

Fylfot (*fɪlfɒt*). [The sole authority on which this word has been accepted by modern antiquaries as the name of the mark in question is the passage from the Lansdowne MS. quoted below. The context in which the word there occurs seems to favour the supposition that it is simply *fill-foot*, meaning a pattern or device for 'filling the foot' of a painted window. There is nothing to show whether the word denoted specifically this device as distinguished from others used for the same purpose, and it is even possible that it may have been a mere nonce-word.] A name for the figure called also a cross cramponnee (see CRAMPONNEE), and identical with the SWASTIKA of India, the *gammadion* of Byzantine ecclesiastical ornament; it has been extensively used as a decoration (often, apparently, as a mystical symbol) in almost all known parts of the world from prehistoric times to the present day. Also *fylfot cross*.
